

Oleksandr Chernukha

Frontend Developer (React / Next.js / TypeScript)

Kyiv, Ukraine · Chorniy2008@ukr.net · Telegram · LinkedIn · Portfolio

ABOUT ME

Frontend Developer with 3+ years of hands-on experience building modern web applications, including 2 years focused on the React ecosystem. Strong in React 18, Next.js 14, and TypeScript, with practical experience in state management, form validation, and UI architecture. Focused on delivering stable, maintainable interfaces that solve real product and business problems.

SKILLS

Frontend: React 18, Next.js 14, TypeScript, JavaScript (ES6+), Zustand, Redux Toolkit

Styling: Tailwind CSS, SCSS, Styled Components, Material UI

Forms & Validation: Formik, Yup, Zod

Tools: Git, Vite, Webpack, ESLint, Prettier, Figma

Other: REST API, Responsive Design, Prisma, Node.js (basic)

WORK EXPERIENCE

Depoistu — Frontend Developer (2022–2023)

- Built and evolved React-based features in a startup environment with rapidly changing requirements.
- Structured frontend architecture and reusable UI components to support fast feature delivery.
- Improved maintainability and development speed by introducing consistent code patterns and tooling (ESLint, Prettier).
- Worked cross-functionally with backend and QA teams to deliver features with minimal regressions.

Data Powers — Frontend Developer (2021–2022)

- Fixed UI and business-logic issues using JavaScript (ES6+) and SCSS.
- Implemented responsive layouts and ensured cross-browser compatibility across key user flows.
- Improved performance and accessibility of legacy components, positively impacting perceived page responsiveness on core screens.
- Worked closely with designers to translate Figma mockups into pixel-perfect, production-ready interfaces.

PET PROJECTS

Tinder-like Matching App (in progress)

Live demo: <https://my-tinder-pi.vercel.app/>

Stack: Next.js 14, TypeScript, Prisma, Zustand, Tailwind CSS, Zod

Dating-style web application with authentication, user profiles, matching logic, and real-time chat.

Built with a production-oriented approach focusing on scalable architecture and state management.

Project completion: ~90%, active development ongoing.

Movies (SPA)

Live demo: <https://movies-amber-ten.vercel.app/>

Stack: Vue 2.6, Vuex, Bootstrap, IMDb API

Single-page application focused on data fetching, state management, and component-based architecture.
