### ABOUT ME

Passionate Frontend Developer with 3+ years of hands-on experience building modern web applications and 2 years focused on the React ecosystem. Skilled in React 18, Next.js 14, TypeScript, Zustand, Tailwind CSS, Formik + Yup, and Prisma. Strong understanding of component-driven architecture, clean code, and reusable UI patterns. Currently developing a Tinder-like app (Next.js + Prisma) to enhance full-stack experience.

### WORK EXPERIENCE

#### Depoistu — Junior Frontend Developer (2022–2023)

- Built and maintained React-based web applications in an agile environment.
- Refactored and modularized code using Redux Toolkit and component libraries.
- Collaborated with QA and backend teams to implement new features and fix bugs.
- Improved code quality by integrating ESLint, Prettier, and consistent naming conventions.

#### Data Powers — Junior Frontend Developer (2021–2022)

- Fixed UI and logic issues using JavaScript (ES6+) and SCSS.
- Implemented responsive layouts and tested cross-browser compatibility.
- Optimized performance and accessibility of legacy components.
- Worked closely with designers to translate mockups into pixel-perfect UIs.
